

SUPPLY MANAGEMENT

Once the strategies have been developed, Energy Management Resources can help you implement them by aggressively negotiating and managing transmission, transportation and supply agreements to continuously meet your supply needs.

Supply Management services include:

- Procurement management, including the RFP process; (Request For Proposal)
- Transportation and transmission management;
- Storage management;
- Utility and supplier contract negotiations;
- Regulatory-action management;
- Price-risk management;
- Contract administration.

Once EMR implements your unique program, strategy reassessment and supply management will continue on an ongoing basis to properly monitor performance and proactively troubleshoot problems. As your energy expert, EMR will help ensure that your energy needs are being managed in the most effective and efficient way.

For more information about how EMR can help you expand your operational effectiveness, call **1-816-883-1000**.
